Re: Application/Control Number 10/670,860  
Art Unit 1744

Dear Sirs:

I am the applicant in the above-referenced matter and am submitting a Reply Amendment thereto.

I CLAIM:

1. (currently amended) A bathtub scrubbing brush of lightweight plastic composition for easy maneuverability comprising:
  - a telescopic handle of adjustable length to accommodate its user, having a hand-contoured grip at a first end and a swivel at an opposite second end;
  - a fine, non-ceramic scratching bristled brush, including a rubberized guard to prevent slipping, which is coupled to said swivel and is rotatable with respect thereto in order to angularly orient the horizontal, vertical and slanted surfaces of the tub to be cleansed;
  - a motor within said handle for imparting at least one of a clockwise and counter-clockwise rotation to said brush, and being energized by an electric battery pack within said handle to operate brush rotation when desired.
